Summary

Over the course of my studies and my side jobs, I've gotten a lot of experience building, teaching, and consulting about statistical models (SPSS, R, lm, lme4). I specialized in machine learning (XGBoost, PyTorch) and full stack web-development using the MERN-stack. I'm looking for was a data analyst/scientist, hoping to grow into a data engineering position.

Education

Utrecht University

Methodology & Statistics for the Behavioural, Biomedical & Social Sciences (ReMa)

7.4 GPA

2022 – 2024

Built statistical knowledge from the fundamental to the applied. Specialized in front end development and machine learning.

Rijksuniversiteit Groningen

Psychology (BSc; Honours)

7.9 GPA

2016 – 2021

Specialized in AI and Cognitive Neuroscience.

Experience

Utrecht University

Research Assistent for ASReview

2023 to now

⬀ https://asreview.nl/

- I look into accurately calculating the degree to which different raters on questionnaires coincide in their judgements.
- Developing my analytical skills in an applied setting and contributing to the development of widely used academic FOSS software.

Rijksuniversiteit Groningen

Statistical Consultant at the Methodology Shop

2021 to 2022

⬀ https://www.rug.nl/gmw/methodology-shop/

Consulted students from Bachelor's to PhD level on planning research, doing analyses, and using statistical software.

- Learned communicating statistical ideas to audiences with various levels of technical ability.
- Learned the importance of letting people realize what they already know by providing them with structure.
